Mr. Steve Bevers
Ms. Sharon Bevers
Energy 4 A Cure Foundation
2257 North Loop 336, Suite 140, No. 329
Conroe, TX 77304

Dear Mr. and Ms. Bevers:

Thank you for the recent grant of \$9,650 from the Energy 4 A Cure Foundation to Washington University for support of Dr. John P. Atkinson's CRV-RVCL research in the Division of Rheumatology in the School of Medicine.

The future of America—and, to a significant degree, global society—will be shaped, in large part, by leading institutions of higher education. Teaching- and research-intensive universities, like Washington University, are primary mechanisms for producing the leadership of the next generation; for encouraging progress in medical, scientific, and technological fields; for building understanding of our changing culture; and for being the agents of change in the 21st century. Men and women here are creating important new knowledge through scholarship and research, and support from the Energy 4 A Cure Foundation offers a wonderful opportunity to improve our world.

Again, on behalf of Dr. Atkinson, all of us at Washington University, and especially those who will benefit from the research conducted with the support of this grant, thank you.

With best regards,

Sincerely yours,

Mark S. Wrighton
