Mr. and Mrs. Steven and Sharon Bevers

Energy 4 A Cure

Suite 150 #401

5000 Eldorado Parkway

Frisco, Texas 75033

Dear Mr. and Mrs. Bevers:

Thank you so much for coming to visit Washington University in St. Louis and meeting with Helen Liu and I to talk about Energy 4 A Cure and the importance of CRV research. It was a great honor to meet you and I really appreciate you taking the time to speak with me and to tour the labs and to help generate ideas about how we can collaborate and partner to foster more research and support for Energy 4 A Cure as well as for fundraising for CRV and for Dr. Atkinson's research.

You all are quite remarkable. You have made major contributions and your support is greatly appreciated. Fundraising efforts from loving family members in honor of those who have died from CRV is incredibly important to the investigators, to the research, to the School of Medicine, and to future generations. The donations make a huge difference by allowing pilot and feasibility studies, and by supporting additional equipment, supplies, reagents, graduate students and postdoctoral trainees. Everything you do makes a significant difference. It inspires us and energizes us to work even harder towards a cure.

I really do appreciate your support. I am very sorry for the impact this disease has had on your families and I promise to work with you to continue to support the research that will help identify a cure and eliminate this disease in the future.

Please do not hesitate to contact me at any time if you have any questions or if there is anything I can assist you with. I look forward to working with you in the future to help support additional activities, golf tournaments, and sporting clay shoots and tournaments both in Texas and in other regions, particularly in St. Louis. I look forward to our ongoing interactions. Thank you again for everything you do.

Sincerely,

Victoria J. Fraser, MD

Adolphus Busch Professor and Chairman
